Senior Software Engineer skilled in Agile methodologies with **~5 years of experience** building scalable SaaS and logistics platforms. Strong frontend expertise with hands-on experience across backend APIs, databases, cloud services, PWAs, warehouse systems, analytics, workflow development and AI-assisted engineering. Experienced in end-to-end feature ownership, from architecture and implementation to production deployment, optimization, and maintenance.

WORK EXPERIENCE

LOCAD | Sep 2024 - Current

Senior Software Engineer

- Built **LOCAD's Warehouse Management System (WMS) from scratch to production**, including a **PWA for warehouse handheld operations** with offline capabilities, resilient data synchronization, and integrated end-to-end warehouse workflows.
- Built an **in-house Returns Management solution for WMS**, integrated with the LOCAD platform to replace inefficient Logiwa workflows and **double warehouse return-processing efficiency**.
- Built a **full-scale OMS & WMS Analytics Dashboard** providing actionable KPIs, operational insights, and workflow visualizations across orders, inventory, fulfilment, warehouses, and carrier/marketplace operations, using **Recharts and Reactflow**.
- Implemented **dynamic localization** with **DOM manipulations** using Google Translate APIs with **AWS Lambda and DynamoDB caching**, enabling multi-regional support and improving international user adoption.
- Led a **platform-wide UI/UX revamp**, improving information hierarchy, usability, workflow efficiency, and operational visibility for brands and internal users. Leading to measurable improvement in workflow speed and satisfaction.
- Integrated **AI-powered capabilities**, including an AI chatbot and analytics experiences, improving user engagement and enabling intelligent insights for business.
- Built **Cursor automations integrated with Slack** for codebase Q&A, bug investigation, query resolution, and PR reviews, enabling AI-assisted engineering workflows across the team.
- Applied **Cursor, GPT, Claude Code, and Claude Design** throughout development for architecture exploration, implementation, debugging, UI prototyping, and scalable solution design.
- Improved product reliability through **Datadog RUM and Google Analytics** and increased automated **test coverage** by **80%** while optimizing application performance.
- Optimized **GitHub Actions and AWS Amplify CI/CD**, migrating **npm** → **PNPM** and implementing dependency caching to reduce deployment time from **~10 to ~3 minutes**.
- Actively contributed to **cross-functional product discussions**, demonstrating proactive ownership in both technical and business decisions, and **delivering top-tier solutions** under tight timelines.

MAD Street Den | Jan 2022 - Aug 2024

Frontend Engineer

- Developed scalable **B2B SaaS applications** using React, Next.js, TypeScript, and modern frontend architecture with a focus on performance, maintainability, and responsive UX.
- Built complex product features including **OAuth Authentication, Table/Bulk View, Workflow Builder, ER Diagrams, Annotation Operations, and Data Visualizations**.
- Designed reusable UI components and frontend patterns using **Redux, Redux Toolkit, React Query, and REST APIs**, supporting large-scale product workflows.
- Improved engineering quality through **unit testing, debugging, code reviews, coding standards, and mentoring junior engineers** within Agile/Scrum teams.

SKILLS

Frontend

React.js | Next.js | JavaScript (ES6+) | TypeScript | Redux | Redux Toolkit | Zustand | React Hooks | React Query / TanStack Query / RTK Query | PWA | HTML5 | CSS3 | SCSS | Tailwind CSS | Material UI | Shadcn UI | Recharts | Reactflow | Dexie.js | WebSockets | Design Systems

Backend & Architecture

Python | Django Rest Framework | REST APIs | PostgreSQL | DynamoDB | AWS Lambda | API Integrations | OAuth - Cognito & Google | Backend Architecture | System Design | Microservices

AI & AI-Assisted Development

Cursor | Cursor Automations | GPT | Claude Code | Claude Design | Prompt Engineering | AI Chatbots | AI-assisted Architecture

Cloud, CI/CD & Engineering

AWS | AWS Amplify | Docker | Git | GitHub Actions | CI/CD Pipelines | PNPM | NPM | Vite | Webpack | Babel | Datadog | Google Analytics

Testing

Jest | React Testing Library | Playwright | Storybook | Pytest | Unit Testing | Integration Testing | BDD Testing | Code Reviews

EDUCATIONAL HISTORY

SRM Institute of Science of Technology

Bachelor of Technology (BTech) - Computer Science and Engineering (2018 – 2022)

GPA - **9.2 / 10** | **President of WHHC Club** (College Tech Club)

ACHIEVEMENTS

HackEd Hackathon - Top 10 | Devfolio Feb 2021

HAC (Hack Against Covid) Hackathon - Top 15 | Devfolio and Codezoned - MLH Aug 2020

SIH 2020 Hackathon - 6th Rank | SIH and SRM University Feb 2020
